

The Barn

Groton, Connecticut Internet Extension from Rectory to Church

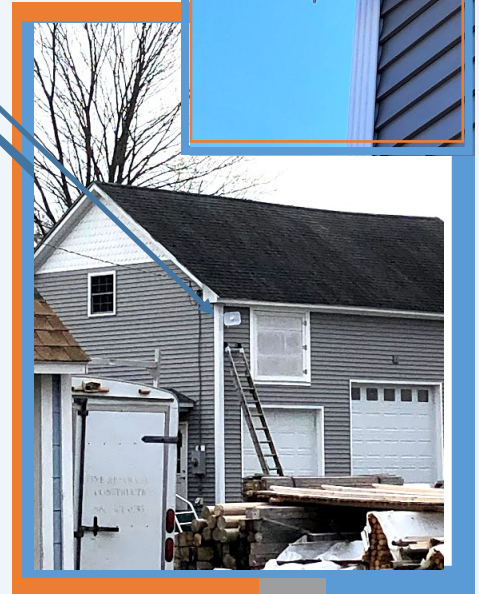

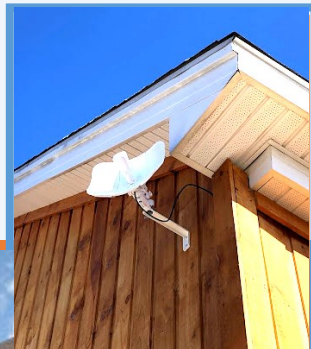

The Barn

Project Summary: Extension of the internet from the Rectory to the Church. Did not require additional modem and monthly charge (MRC).
The underlying issue was no internet in church. COMCAST buildout charge was going to cost \$25K+ MRC to dig up parking lot to install cable.
The solution was installation of invisible microwave link joining Rectory and church. Now the church has streaming Wi-Fi and internet.
